INDUSTRY: Banking and Capital Markets

COUNTRY: United States

TECHNOLOGY ENVIRONMENT

- Azure
- Azure Active Directory

Azure Active Directory Migration

Client

- Global Leader in Banking Industry.

Business Requirements

- Perform migration 35,000 users and 2,000 applications from different domains to single Active Directory Domain
- Use programmatic migration approach by using the Azure Active Directory Migration Service (ADMS)
- Migrate the data for all users in an efficient and secure manner to maintain data integrity
- Perform migration of all user accounts on four active Directory domains to single domain

Scope of Services

- Migrating user accounts to a single Active Directory domain as different rules governing each domain was difficult for user access
- Developing a modernize IT infrastructure to deliver new products and services to clients

Solution Highlights

- Futran Solutions provided solution to bank so they can speed the delivery of new products and services to its customers
- Futran Solutions successfully completed the migration so bank would continue its digital transformation.
